

Your field data. In Australia. Fully governed.

GoFormz now operates a dedicated Australian data centre. All customer data is **stored, processed, and governed entirely in-country** — under Australian Privacy Principles, with no cross-border data transfer required. Built for construction and energy teams in compliance-sensitive, high-risk environments. The procurement blocker is cleared.

100% AU-resident

STORED · PROCESSED · GOVERNED

Zero cross-border

NO DATA TRANSFER REQUIRED

APP compliant

BY DESIGN, NOT WORKAROUND

99.9% uptime

SOC 2 TYPE II GOVERNANCE

1 What this means for your operation

THREE CHANGES YOU'LL FEEL

In-country. Always-on.

The Australian data centre delivers lower latency and higher reliability for mobile forms used on remote job sites and energy assets — where connectivity is already the constraint. Offline-first capture syncs automatically when connectivity returns.

YOUR DATA STAYS WHERE IT BELONGS

Built for compliance-critical work.

Safety inspections, permit-to-work, incident reports, daily reports — captured, routed, and stored within Australian jurisdiction. When an audit comes, the trail is complete, in-country, and defensible.

COMPLIANT BY DESIGN — NOT BY WORKAROUND

Procurement blocker: cleared.

Australian Privacy Principles are satisfied. IT and procurement sign-off is no longer the blocker. Line-of-business leaders can deploy GoFormz in weeks — without a 12-month IT engagement.

WEEKS, NOT A YEAR

SECURITY & COMPLIANCE

Enterprise-grade reliability—now local.

SOC 2 Type II governance. 99.9% uptime. Offline-first field capture with instant sync on reconnect.

SOC 2 Type II

99.9%

GoFormz's investment in an Australian-based data centre is a positive development for our partnership. Local hosting supports our data residency requirements and delivers performance benefits that assist our operational teams. This capability strengthens our digital operations and reflects GoFormz's ongoing role as a key technology partner.
